Preface

This is the fourteenth edition of the *Directory of Energy Data Collection Forms*, an authoritative listing of selected public use forms currently used as basic energy information gathering tools by the Department of Energy (DOE). Originally entitled *EIA Data Collection Forms*, this directory provides an overview of DOE's energy information collection programs for decisionmakers in government and industry.

All DOE forms designed to collect energy information and used by the EIA that had Office of Management and Budget (OMB) approval on October 1, 1990, are in this directory.

For each form listed in this directory, an abstract is included that describes the form's uses, its respondents, and the data collected. Also shown are certain frequently requested items of information. These items include the general energy source(s) and function(s) covered by the form; the general categories of respondents; the frequency of collection; the public laws and, if applicable, regulations associated with the collection; the requirement for reporting; the name and phone number (Washington area code 202 unless noted otherwise) of the data collection manager; and the publications resulting from the data collection.

A sample entry, annotated to show the format, can be found on page vi.

For the reader's convenience in finding specific types of collections, several indices have been provided in this directory. A listing of the forms grouped by energy source and function begins on page 23. Beginning on page 31 are the publications derived from the collections, and on page 45, the forms linked to general respondent categories. Former form number designations appear on page 53. Titles of legal citations referred to in this directory can be found on page 61.

Additional information about these and other DOE forms is maintained by EIA's Data Collection Services Division.

AFTER THE DECLARATION OF INDEPENDENCE OUR FOUNDING FATHERS WROTE SOMETHING EVEN MORE IMPORTANT.

Ten years after the signing of the Declaration of Independence our founding fathers created what historians have called the greatest single document struck off by the hand and mind of man.

Our founding fathers created the Constitution of the United States.

For the first time in history, power was granted by the people to the government, and not by the government to the people.

The freedom unleashed by the Constitution allowed Americans to develop their talents and abilities to the fullest. And attain what is now known the world over as the *American Dream*.

As we commemorate the Bicentennial of the Constitution, there is no better way for you as an American to reaffirm the principles for which our country stands than to learn more about the Constitution.

The words we live by.
